Phone: +64 (4) 473 2721

Dear Sir Madam,

I am writing this to lend our full support and cooperation to **Urban Wildlife Trusts'** application for funding to install Feather Friendly® Technologies decal on our building.

As the owners of the building, located between two significant bird habitats - Wellington Botanic Garden sitting adjacent to the Wellington Cable Car building on the northern side and Zealandia Ecosanctuary which is located within a kilometre of the building to the south, this puts Wellington Cable Car central to two significant ecological areas of the city, and also in the flight path of native birds.

We see first-hand the number of bird strikes caused by the large glass windows located at our Kelburn Terminal. We are excited to work with the Urban wildlife Trust to deliver this innovative project, with the aim of reducing and hopefully eliminating any further deaths caused by strike.

If you require any further information or assistance, please don't hesitate to contact me.

Ngā mihi,

CP

Cesar Piotto | Chief Executive
