To Whom it May Concern

RE: Funding application for Urban Wildlife Trust, Feather Friendly project

Dear Sir/Madam,

Wellington Zoo Trust support the proposal from Urban Wildlife Trust for funding for the Feather Friendly project for window markers to be installed on the Wellington Cable Car summit terminal building to help in the prevention of bird strikes.

At The Nest Te Kōhanga, the Veterinary hospital at Wellington Zoo, we have many patients who have succumbed to window strike – particularly Kererū. Any initiative that can prevent this injury is fully supported by us. Bird strike on windows is estimated to kill or injure over 30 million birds annually worldwide so it is imperative that we make our urban environments bird friendly.

Yours faithfully

Karen Fifield MNZM

Chief Executive
